Valley FR 330

Valley FR 330 is a fire-retardant latex finish for interior and exterior use, in compliance with the Egyptian Standard Specification 1123 of 1972 and 1539 of 1993.

General Specifications:

- Bright white matt latex paint that consists of vinyl resin emulsions, and innovated fire-retardant materials. It depends on limited emission of gases, but it's capable of stopping fire spreading according to the resistance to fire test in the Egyptian Standard Specification.

Fields of Use:

- Painting internal wood surfaces of partitions and ceilings in houses, schools, gems, hospitals, and restaurants to protect them from fast fire spreading.

Advantages:

- High coverage with low consumption rate.
- Resistance to weather conditions, humidity and ultraviolet rays.
- Fire-retardant and easy to use with the roller, brush or spray gun.
- Washable with water and highly-resistant to abrasion and friction.
- Fast drying and used for interiors and exteriors

Technical Characteristics: (at 25 ° C):

- Density: 1.35 ± 0.02 (kg/liter)
- Viscosity: 15 – 20 poise
- pH: 7.5 – 8.5
- Color: White or any color from Valley color chart
- Solid Content (by weight): 52 % ± 1 %
- Fire-Retardant Materials / Solid Content 23 % ± 1 %
- Resistant ESS 1123 of 1972: Complied
- Consumption Rate: 150 – 250 gm. / m2 for each paint coat.

Storage: 6 months in closed packs under proper storing conditions.
