Valley Sealer 990

Description & Features:

Valley Sealer 990 is water base alkali resistant emulsion sealer with high surface penetration properties for excellent bonding and inter coat adhesion to exhibit an exceptional performance of prime coat to the next layers paint system.

Recommended use:

Recommended for external and internal use on all new or old surfaces such as concrete plaster surfaces, cement, gypsum boards.

Technical Specifications:

Color	White
Thinner	Dilution when needed (Fresh Water)
Flash Point	Non Flammable
Washability	Washable
Spreading rate	11-13 m2/liter

*The actual Spreading rate depends on many factors such as porosity of substrate, surface preparation & application means.

Usage Condition: Atmosphere must be free of dust during use and drying, surface temperature should not be less than 5°C
